

CAPABILITY OVERVIEW

I build useful software, and advise on *AI-driven* transformation.

AI-first full-stack developer and business/AI consultant. I turn ideas into working technical prototypes, and turn processes into AI & agentic AI roadmaps, moving between product decisions, system architecture, and the model layer itself.

WHAT I HELP WITH

Build

MVP development, full-stack applications, web applications, technical prototypes

Consult

AI & agentic AI transformation roadmaps, technical product & program delivery, business process optimization, no-code/low-code automation

Product

UX + AI-native strategy, product discovery, feature prioritization, metrics design

Enhance Intelligence

LLM integration, AI automation, agentic workflows, retrieval systems (RAG)

Architect

System design, technology selection, scalability planning, API strategy

Explore

Emerging tech feasibility, local LLM deployment, agent architecture, AI infrastructure

SELECTED WORK

Prism

3 MODES · 2 APIS · LIVE

Paste a website, pick a mode: a fast TL;DR, a full song written from the page, or a kid-friendly explanation with a story and a quiz — real AI under the hood, end to end.

React

TypeScript

Gemini API

ElevenLabs

Gmail & Google Chat Sentiment Analyzer

6-PANEL DASHBOARD · 8 FILTERS

Phrase-based sentiment analysis across Google Workspace communications, with context extraction, dual-metric scoring, and constraint-based filtering.

Python

TextBlob

OAuth 2.0

Matplotlib

Microsoft 365 Sentiment Analyzer

6 SOURCES · 4 CHART TYPES

Full-stack sentiment analysis across Teams, Outlook, OneDrive, SharePoint, and OneNote, with a hybrid VADER + TextBlob NLP engine and interactive visualizations.

Next.js

FastAPI

Docker

Recharts

CREDENTIALS

MSc Computer Science (Distinction), University of Greenwich · AWS Solutions Architect – Associate · Azure Developer Associate (AZ-204) · Azure Fundamentals (AZ-900) · Google AI Essentials · OutSkill AI Generalist Accelerator
